

VisConf

Create an animated version of your talk from transcript and slides.

Problem?

So a lot of times, small meetups do not have resources to record a talk and hence the world never gets to see these amazing talks!

Solution

A talk visualizer that generates an animated version of your talk from **transcript** and **slides**.

How?

1.

Upload `slides.pdf`
and `transcript.md`
on any cdn or
GitHub Repo

<https://github.com/saurabhdaware/visconf-example>

Branch: **master** ▼

New pull request

saurabhdaware init

Transcript.md

slides.pdf

2.

Fork

<https://github.com/saurabhdaware/visconf> and
add raw paths to
src/talks.json

```
src > {..} talks.json > {} data > {} saurabhdaware > {} build-npm-packages
1  {
2      "data": {
3          "saurabhdaware": {
4              "build-npm-packages": {
5                  "title": "Building and Publishing NPM Packages",
6                  "eventName": "Mumbai JS",
7                  "slidePdfLink": "https://raw.githubusercontent.com/saurabhdaware/visconf/master/src/talks/saurabhdaware/build-npm-packages/slide.pdf",
8                  "transcriptLink": "https://raw.githubusercontent.com/saurabhdaware/visconf/master/src/talks/saurabhdaware/build-npm-packages/transcript.md",
9                  "character": {
10                     "skinColor": "#f30",
11                     "tshirtColor": "#09f",
12                     "hairColor": "#222"
13                 }
14             }
15         }
16     }
17 }
```

3.

SEND PULL
REQUEST!!!

Once a PR is merged, your talk will be visible on

`https://visconf.netlify.com/:githubusername/:slug-you-choose`

Thank You!
