VisConf

Create an animated version of your talk from transcript and slides.

Saurabh Daware

Problem?

So a lot of times, small meetups do not have resources to record a talk and hence the world never gets to see these amazing talks!

Solution 🎉

A talk visualizer that generates an animated version of your talk from **transcript** and **slides**.

How?

1.

Create
transcript.md

Sample:
Hey There!
| I am Saurabh, and today I am super excited to announce VisConf!!

|| A lot of times in meetups, I see talks on some amazing topics
| Sadly small meetups do not have resources to record and publish these talks
| However the world needs to see them $wait2s

**Special Characters:**
- | : Move to next text
- || : Move to next slide
- $wait2s
- $wait5s
- $wait10s : Pause for 2s, 5s, 10s

2.

Upload `slides.**pdf**` and `transcript.md` on any cdn or GitHub Repo

Branch: **master** ▾

New pull request

saurabhdaware init

📄 Transcript.md

📄 slides.pdf

3.

Login, Fill the form and create your talk!

Title

Web Performance Hacks

After creating, Your talk will be visible on https://visconf.netlfy.com/saurabhdaware/web-performance-hacks
